spring-form-taglib-demo
===========
Spring MVC -> JSP

This example has been validated with the following environment on MS Windows 7:

1. Eclipse Kepler
   1.1 Spring Tool Suite (STS) 3.4.0.RELEASE - for Kepler
2. Java SDK 1.7.0_51 (separate install)
3. Tomcat 7.0.50 (separate install)
4. Maven 3.0.5 (separate install)
5. All jstl are in reame_jsp-variables-jstl.pdf
   For example:
   (1). If statement:
```
        <c:if test="${empty generalLicenseePage.getContent()}">
            There are no GeneralLicensees
        </c:if>
```

   (2). Define a varialbe:
```
        <c:url var="prevUrl" value="/listAllGeneralLicensees/${currentIndex - 1}/"
/>
        <li><a href="${prevUrl}">&lt;&lt;</a></li>
```

   (3).   choose statement:

```
<c:choose>
    <c:when test="${currentIndex == 1}">
        <li class="disabled"><a href="#">&lt;&lt;</a></li>
    </c:when>
    <c:otherwise>
        <li><a href="${firstUrl}">&lt;&lt;</a></li>
    </c:otherwise>
</c:choose>
```

(4). foreach statement:

```
<c:forEach var="i" begin="${beginIndex}" end="${endIndex}">
    <c:url var="pageUrl" value="/listAllGeneralLicensees/${i}/" />
    <c:choose>
        <c:when test="${i == currentIndex}">
            <li class="disabled"><a href="${pageUrl}"><c:out
value="${i}" /></a></li>
        </c:when>
        <c:otherwise>
            <li><a href="${pageUrl}"><c:out value="${i}"
/></a></li>
        </c:otherwise>
    </c:choose>
</c:forEach>
```
